

GGHJ-M300系列
激光模具焊接机

GGHJ-Z系列
振镜扫描激光焊接机

机型简介：

激光沉积焊接系统（激光模具焊接机）专门针对模具行业设计，用于精密模具的修补，如数码产品、手机、玩具、汽车、摩托车等模具制造和成型行业。通过模具的修补，可以将原来的模具重新充分利用，大大节约了生产成本和提高了工作效率。此技术更可应用于修改模具的设计或尺寸，减短产品开发的周期。

The laser deposition welding system (laser mould welder) is specially designed for the mould industry and used in repairing of precision moulds, such as mould manufacture for digital products, mobile phone, toy, automobile and motorcycle, and molding industry. Through the repairing of moulds, it is possible to reuse the moulds, save the production cost and improve the working efficiency significantly. This technology can also be used to modify the design or size of moulds to reduce the development period.

机型特点：

此激光沉积焊接系统的工作原理，是以激光高热能并集中定点的熔接技术，有效处理一切微小部分的焊接及修补工作，弥补了传统氩弧焊技术在修补焊接精细表面时的不足。避免了热应变和后处理这两道门槛，大大节省了模具的生产周期。

The working principle of this laser deposition welding system is to use laser high thermal energy and the melting technology in spot to process the welding and repairing of minute parts. It makes up the shortage of traditional hydrogen arc welding in repairing precision surfaces, avoids the two difficulties of thermal strain and after-treatment, and saves the production period of mould.
